

JUNE WINNER

70 Red Buckets of Surprises!

“ We had a project that was a floor coating project at a pharmaceutical plant near Florence SC. We added grit to make it a non-skid surface. The greatest thing about that product is the ease of application. We used a squeegee to apply it and it rolls out really well. Our customer was concerned about “paint smell” but this product had little to none. We ran out of product the last day and Trent Woodard jumped through hoops to get the much needed material to us. Needless to say we were happy when the FedEx truck rolled up with the Carboline Solution. ”
