

JULY WINNER

70 Red Buckets of Surprises!

“ Hardig Industrial was contracted to remove and replace some Safety Aisles in a local Bus Terminal. The kicker was we only had a 12 hour window to remove existing coatings, prepare the floor and install a new system that would hold up to constant vehicular traffic. Our only option was Methylmethacrylate. I knew Carboline had a partnership with Flowcrete and Jason could supply us with the materials we needed to meet the schedule. It was a long Saturday but we completed the project with Jason Hopping on site to ensure we were comfortable with the new material. We have installed MMA many times. This was our first with Flowcrete/ Carboline. The project was executed on time and the customer was satisfied with everyone's effort. ”
